EXCEL ANALYTICS PROJECT

Coffee Sales Executive Dashboard

AI-assisted VBA, PivotTables, linked charts, KPI cards and slicers

Hanraj Hari Krishna · MIS Reporting Specialist

Workflow: raw sales to live dashboard

01

Source tables

sales, products, customers and city sheets

02

AI-assisted VBA

Builds MasterData with XLOOKUP joins plus Year and Month columns

03

PivotTables

5 pivots for city, product, month and KPI figures

04

Dashboard

KPI cards and 4 charts: monthly, city, top and bottom products

05

Slicers

Click-to-filter controls; a refresh macro updates every pivot

Outcome: one-click refresh from raw transactions to a filterable executive view.

Dataset: 2 years of coffee sales

10,388	28	497	14
sales transactions	products	customers	cities

products
28 rows
product, price

sales
10,388 rows
date, total, rating

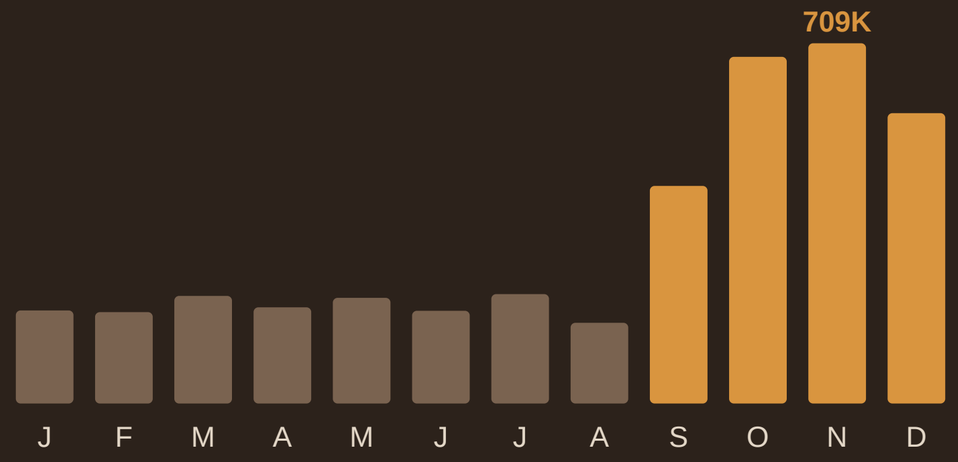

customers
497 rows
name, city

city
14 rows
population, rent, rank

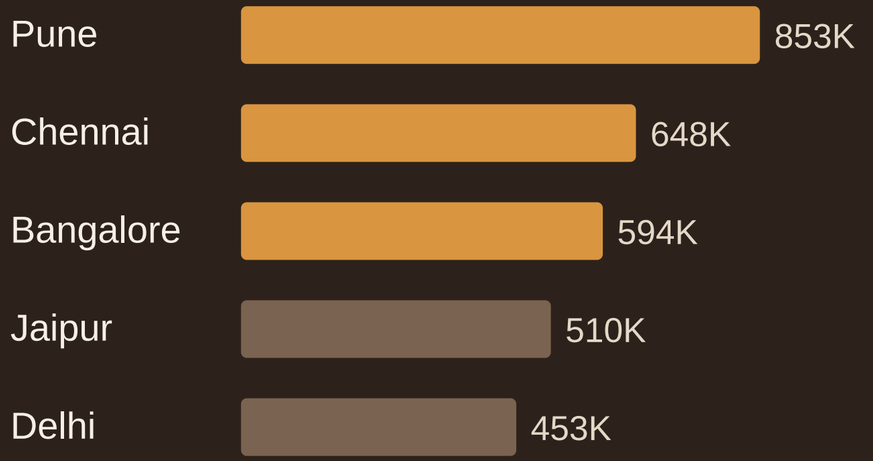

Sales dates run from Jan 2023 to Oct 2024. MasterData joins all four sheets into 16 columns.

Business insights (2023 view)

Sep–Dec = 61% of 2023 revenue

Top 3 cities = 53% of revenue

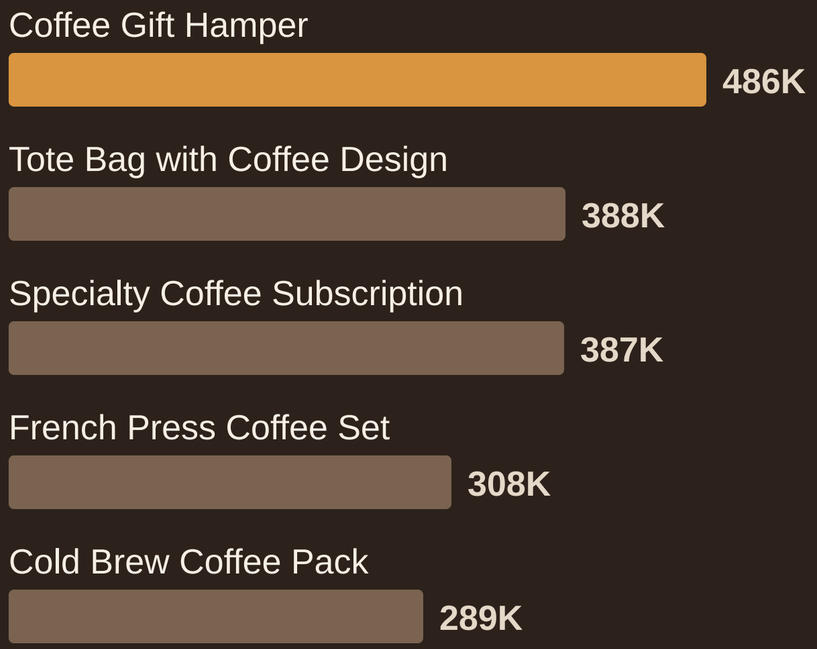

Top cities: Pune (853K), Chennai (648K), Bangalore (594K). **Top products:** Gift Hamper (486K), Tote Bag (388K), Coffee Subscription (387K).
Action: plan stock and campaigns for Sep–Dec.

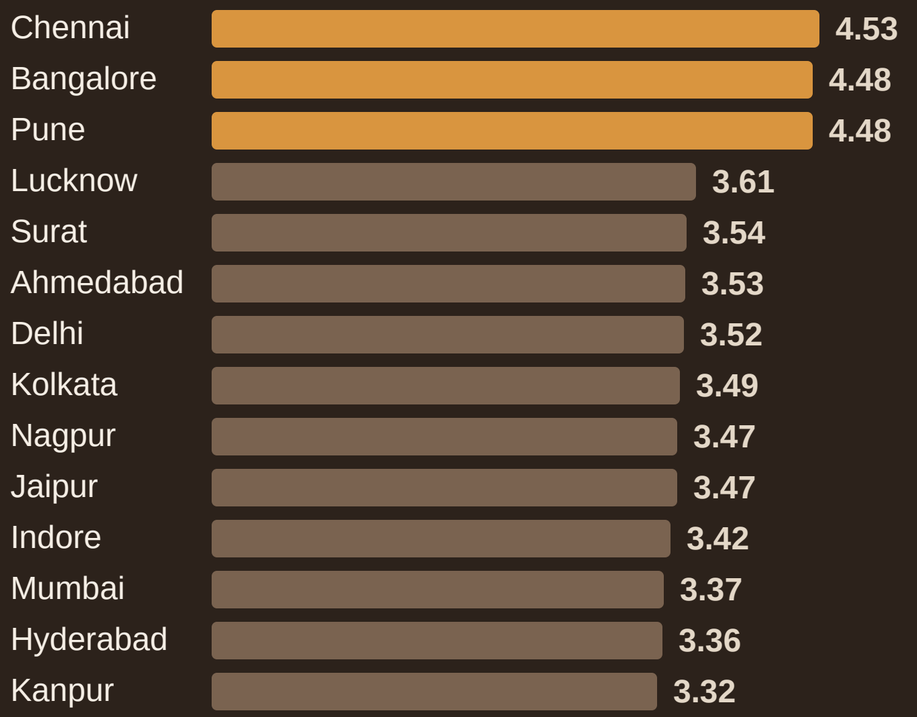

Source: dashboard filtered to 2023, total revenue 3,920,300

Top products and ratings by city

Top 5 products by revenue

Average rating by city

Source: dashboard filtered to 2023. Chennai, Bangalore and Pune rate about 4.5; every other city 3.3–3.6.
